

Georg Heinig in Memoriam by His Colleagues

In May 20th, a shocking condition happened to the science world, especially in some structured matrices field students. One of the experts of the structured matrices, Georg Heinig was found dead in his apartment in Kuwait. Georg was found dead, and the death cause is confirmed as the heart attack. It has been a while that some of his closest friends knew that he had something wrong inside, but somehow, his spirit kept him to move.

Georg Heinig is one of the structured matrices experts. He has been well known as the active member of the Integral Equations and Operator Theory journal. His writing is always a perfect guidance for the students. Georg Heinig was died in the age of 57. The world has simply lost the one of the best experts of the structured matrices experts. What a great lost to the science.

For some reasons, his colleagues have decided to make some sorts of tribute to him.

In their writings on the Georg Heinig in Memoriam, they have stated that Georg Heinig would always be one of the best colleagues that they have ever had. Furthermore, Georg Heinig is one of the greatest experts of the structured matrices, some kinds of rare expertness.
